

# Cinis Fertilizer receives environmental permit for its second production plant

**The Swedish Land and Environment Court in Umeå today announced that an environmental permit has been granted to Cinis Fertilizer AB regarding the production of mineral fertilizer in Bergsbyn, Skellefteå municipality, Sweden.**

“It is very gratifying that Cinis Fertilizer receives an environmental permit also for our planned operations in Skellefteå. We have come a long way in the planning and will use the experience we gain from the ongoing establishment of our production facility in the municipality of Örnsköldsvik. With that knowledge, we can more efficiently build a facility twice as large in Skellefteå, near the electric vehicle battery manufacturer Northvolt,” says Jakob Liedberg, CEO of Cinis Fertilizer.

Construction of Cinis Fertilizer’s plant in Skellefteå is planned to start in 2024 and production will begin in 2025, with a capacity of around 200,000 tons of environmentally friendly potassium sulphate (SOP).

## **About Cinis Fertilizer**

Cinis Fertilizer is a Swedish green tech company aiming to produce the world’s most environmentally friendly mineral fertilizer, potassium sulphate (SOP), by recycling industrial waste products from the pulp & paper industry as well as the car battery manufacturing industry. The patent protected technology will use half as much energy as today’s production methods and the result is a fertilizer with a close to zero carbon footprint, a unique and circular contribution enabling sustainable agriculture. FNCA Sweden AB is Certified Adviser. For further information please visit: [www.cinis-fertilizer.com](http://www.cinis-fertilizer.com).
